

Joining Netviewer meetings via the Web client

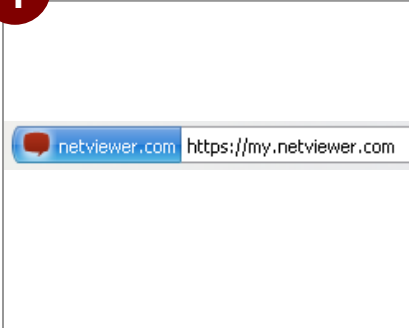

The Web-Client enables any user to participate in Netviewer Meet sessions.

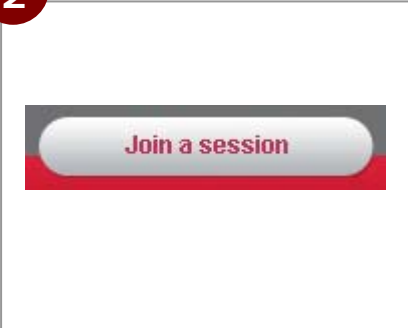

Nothing to download * no need to run an .exe file * no installation * participation even with strict security policies * no activation of ActiveX necessary
* for users of Windows, Linux and Mac operating systems

How to start the Web client and participate in a Netviewer meeting:

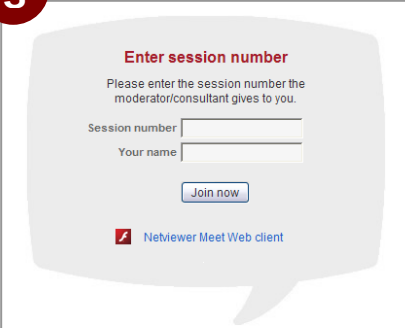

1

2

3

Enter the URL www.netviewer.com into your browser.

Click on *Join a session* on the upper right hand side.

Click on *Netviewer Meet Web client*.

4

5

Enter the session number (which you received from the Moderator) and your name.

Click on *Join now* to enter the meeting.

If the session is password protected, a further window will be displayed for entering the password.
