

# Overview of Netviewer shortcuts

Netviewer keyboard shortcuts are a convenient way to quickly access commonly used Netviewer functions.

1

Stop transmission of the screen

You can interrupt transmission of your screen by pressing the key combination **[Win]+[S]**. A static image of your current screen will be transferred instead.

2

Start transmission of the screen

To restart transmission of your screen, including changes, press the key combination **[Win]+[P]**.

3

Extend and retract Control Panel

Extend and retract the Netviewer Control Panel by pressing the key combination **[Win]+[N]**.

4

Multi-monitor support

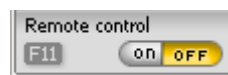

If your computer has several monitors, your session partner will see (when you are in Show mode) only the screen where the Netviewer Control Panel is located.

By pressing the key combination **[Ctrl]+[Alt]+[S]**, you can move the Control Panel to the next screen.

5

Revoke remote-control rights

You can revoke your session partner's remote-control rights for your computer by pressing the **[F11]** key.

6

Exit Netviewer

Exit the Netviewer program by pressing the **[Alt]+[F4]** key combination.
