

Video transmission

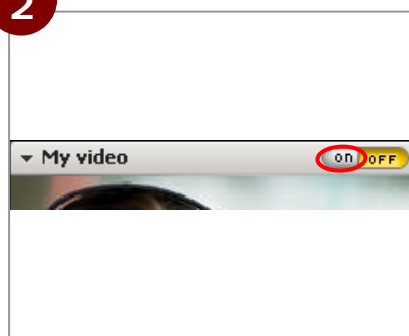

Netviewer Meet enables you to view the Webcam videos of up to session partners simultaneously as well as to transmit your own Webcam video.

1

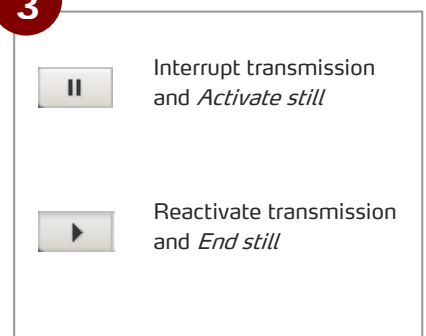

In the *My video* tray you see the video stream of your own Webcam.

2

In the *My video* tray click *on* to activate transmission of your Webcam video stream to the other participants.

3

To interrupt or reactivate transmission, in the lower left of the *My video* tray click on the button *Activate still* or *End still* respectively.

4

In the *Video* tray you will see the videos of those session partners who have activated transmission of their video.

5

Tip: In the context menu you will have access to the following functions: Show or hide all the participants' names, enlarge or reduce all images.

6

Tip: To scale or freely position individual videos on your screen, click on the desired video and drag it out of the *Video* tray.
